Webinar Registration Link: <https://forms.gle/NwwZD83pTFcM4Njy8>

The association is committed to the economic and sustainable advancement of the sugar in particular and allied industries in general and also associated communities through promoting innovative research, development and adoption of new technology, and by sharing the knowledge among its members for their professional development.

The idea of forming a new association i.e. The Asian Association of Sugar Cane Technologists' (AASCT) is conceived as there is no such organization which represents sugar-producing countries mainly from the Asian region. Moreover, there are about 23 Asian Countries which produces sugar either from sugarcane or sugar beet.

To bridge the above gap and to interchange technical knowledge and advancement of new technology in the Asian region, AASCT will also bring out magazine or journal which will be called as Asian Sugar Journal (ASJ).
